

LIMITED SPOTS!

INTERACTIVE WORKSHOP

Enhance your expertise in Overactive Bladder management with flexible Cystoscopy and Botox under Local Anaesthesia.

 07 December 2024 9:00am - 1:00pm

 Epworth Education and Simulation Centre
Lower Ground, 124 Grey St. Building, Epworth Freemasons, East Melbourne, VIC 3002

Learning objectives

- ✓ Discuss patient selection, risks and benefits of Onabotulinum toxin injections in refractory OAB and neurogenic detrusor overactivity including when to instigate intermittent self-catheterisation.
- ✓ Describe simplified evaluation of patients with neurogenic and non-neurogenic detrusor overactivity.
- ✓ List criteria for comprehensive urodynamic assessment.
- ✓ Demonstrate competence with injection technique, distribution and depth.

Prof Helen E O'Connell AO MD, FRACS, MMed, MBBS, FAICD

Professor O'Connell is the President of the Urological Society of Australia and New Zealand (2023-2025). An academic Urologist based in Melbourne, she was Director of Surgery and Head of Urology at Western Health from 2016-21. She was Councilor for Royal Australasian College of Surgeons 2005 - 2014. She was the Urology lead for the Australian Pelvic Floor Procedure Registry (APFPR). She is an expert in local anaesthetic Botox injections and recognised authority in Female and Functional Urology.
