

Observed Surgical Performance (OSP)

The main purpose of this tool is to provide feedback to the trainee so that they may progress towards competence. **Please note that you are evaluating the trainee's performance to provide patient care safely and independently and as such should consider their performance as compared to a practising urologist.**

Date		Relevant EPA	n/a				
Trainee Name		Assessor Name					
Case Complexity	Low Medium High	SET					
Case Description							
For each component, indicate on the line how much guidance the trainee requires to provide safe patient care. Compare the trainee to a graduating urologist rather than their level of training. Select 'n/a' if the component was not observed.		n/a	<table style="width: 100%; border: none;"> <tr> <td style="text-align: center;"> _ _ _ _ </td> <td style="text-align: center;"> _ _ _ _ </td> </tr> <tr> <td style="text-align: center;">Significant Guidance</td> <td style="text-align: center;">No Guidance Required</td> </tr> </table>	_ _ _ _	_ _ _ _	Significant Guidance	No Guidance Required
_ _ _ _	_ _ _ _						
Significant Guidance	No Guidance Required						
Preoperative Reviews management plan, ensures patient is ready for surgery and medication is managed, if required; reviews relevant investigations.			_ _ _ _				
Safety Participates in pre-operative team discussion and surgical checklists; positions patient safely.			_ _ _ _				
Equipment Selects and utilises surgical instruments and consumables efficiently.			_ _ _ _				
Surgical skill Demonstrates manual dexterity and coordination; efficiently performs procedural steps.			_ _ _ _				
Situational awareness Anticipates possible complications and plans and responds accordingly; manages unexpected issues.			_ _ _ _				
Communication Communicates effectively with theatre team; delegates tasks appropriately; maintains professionalism under pressure.			_ _ _ _				
Postoperative Comprehensively documents procedure, provides detailed instructions for postoperative care.			_ _ _ _

Overall Rating

For the NEXT case of similar complexity, the trainee:

1. Requires regular direction to talk them through (senior surgeon scrubbed may perform part of procedure).
2. Requires intermittent direction as a prompt from time to time (senior surgeon scrubbed and assisting).
3. Requires a senior colleague observing or immediately available just in case.
4. Can complete independently and will request help if needed.
5. Can complete complex cases.

Describe at least one specific aspect the trainee completed well

Describe at least one priority area for improvement
